

MYRTLE

Age: Juvenile

Sex: Female

Type of Dingo: Alpine

Colour: Cream

Companion: Tanami

Year of Arrival at the Sanctuary: 2020

Background:

My brother and I were found close to death from malnutrition in Victoria's High Country. Thankfully we were soon on our way to the safety and care of the Sanctuary where we have been nurtured back to good health.

About:

DNA tests have shown that I have no dog ancestry, further proving that true original dingoes still roam the diminishing forests of Victoria!

Other Info:

When I first came to the Sanctuary, my brother and I used to hide under the couch in the main house.

I have a wonderful relationship with Tanami but am way faster than him...I do always wait at the gate for him to catch up though!

Watching the world go by

Having a bath in the water trough!

Out enjoying the grass
